What is Junior Wellness Bloodwork??? 8% of all healthy young dogs and cats have underlying organ, electrolyte, or endocrine dysfunction. We consider all pets under the age of 7 years to be young dogs and cats. By doing screening bloodwork on your pet, we can detect early disease before your pet becomes sick and make preventable

health changes which may be as simple as a dietary change. We will also be able to establish baseline data to compare with any future bloodwork. Invest in the health of your pet now and save later. Please ask us for further details.

-Dr. Rosenoff & Dr.

Edwards

Safety Zone

Halloween Hazards

- chocolates are harmful to your pet
- candy or gum sweetened with xylitol is toxic
- candles can easily be knocked over and burn your pet

Fall Hazards

- fertilizer for lawns are very hazardous if ingested

PET OF THE MONTH

Malcolm's life was spared by his adoption by the Whalen's at the Orange County Animal Shelter. Malcolm enjoys sunny days, sticks with tassles, and lounging under the bed . He lives with Moses and Twiza here in Cary. He currently is suffering

from a cold, but hopes to be chasing mice soon.

Malcolm will receive a Free Frontline dose for the month of October. Be sure to register your pet on your next visit, or email a picture to the clinic.
